Abstract of JP2000268443

PROBLEM TO BE SOLVED: To perform operation corresponding to the use of a tape cassette.

SOLUTION: A worm flag showing the use of the tape cassette is stored in the MIC that the tape cassette has. The contents of the worm flag are 'general' indicating a general use, e.g. 'WORM' allowing additional recording as to recording.

When the tape cassette is loaded, the tape drive decides the use of the tape cassette from the use number and operates corresponding to the use of the tape cassette.
